To the Team That's Been Looking for Me (*Surprise! Here I Am*),

I build GTM revenue engines that measure what matters, and kill what doesn't.

Whether it's campaign ops that scale, intent scoring that sharpens focus, or attribution that earns trust and sustains retention — I've done it all, and I'll do it again here.

I'm a **launch-obsessed, full-stack marketing leader** who turns complex problems into revenue-producing results. My zone of genius sits at the intersection of **GTM strategy, lifecycle automation, CRO, paid media, and conversion copy** that actually converts. I do not just launch campaigns. I build systems that make growth repeatable, measurable, and easier to scale.

What makes me different is that I bring both the **strategy brain** and the **operator brain**. I can build the plan, write the copy, pressure-test the funnel, QA the attribution, translate performance data into action, and keep cross-functional teams moving without letting the system turn into chaos.

90-Day Plan

- **GTM Strategy:** Audit current GTM systems, launch workflows, enablement kits, and handoff points to identify friction, gaps, and missed revenue opportunities. Build tiered launch checklists, clearer SLAs, and a tighter feedback loop across marketing, sales, product, and customer-facing teams.
- **Competitive Intelligence:** Establish a recurring market scan and win-loss loop to dissect competitor positioning, offers, pricing, and messaging. Translate findings into sharper positioning, stronger sales narratives, and smarter roadmap or campaign recommendations.
- **Positioning & Messaging:** Audit existing ICPs, buyer archetypes, and messaging by segment. Rebuild narratives around buyer psychology, buying triggers, pain points, objections, and decision-stage behavior so every campaign speaks to the right customer at the right moment.
- **Demand & Attribution:** Audit full-funnel attribution from first touch to revenue. Strengthen UTM discipline, source-to-revenue visibility, dashboarding, and reporting workflows so leadership can see what is working, what is leaking, and where to optimize next.

I'm looking for a role where I can bring the same energy I've brought everywhere else: **strategic intensity, clean execution, strong ownership, and a bias toward making things better fast. I do not need hand-holding. I need a mission, a clear target, and the room to build.**

Sincerely,
